Reno Orthopedic Center Presents the
ROC STAR PROGRAM
partnered with Reno Aces

Five nominees will be selected throughout the 2022 season between April through August.

The "ROC Star" program recognizes and acknowledges exceptional people within our community. Nominees stand out in one or more of the following: special qualities or skills, excel in sportsmanship, or have persevered through some type of difficulty.

The selected "ROC Star" will be recognized during the first pitch of the game with their name, story, and photo along with receiving six tickets to that game for family and friends. As well, their name, story, and photo will be posted on ROC's and Aces' Social Media.

When nominating someone, please submit a brief paragraph about why they are being nominated, with the nominee's contact information to marketing@renoortho.com or scan this QR code to fill out a quick form

All Orthofeet Display Styles on Clearance

- Padded Collar:** Soft, seam-free lining with extra foam padding eliminates pressure points
- Projective Lining:** Forms to the contours of your feet, providing a customized fit, and easing pressure point sensitivity
- Heel Cushion:** Mild Rocker improves the ease of walking and adds spring to your step
- Foam Padding & Tie-Less, Two-Way Strap Systems:** Fast and easy method of fastening and unfastening the shoes
- Wide Toe Box:** Alleviates pressure on swollen feet, bunions, and hammertoes
- Anatomical Arch Support/Booster:** Re-align the foot & body posture, while also relieving heel pain and foot discomfort
- Rubber Outsole:** Provides advanced grip and excellent stability via the lightweight sole with Ergonomic-Stride

25% OFF

the shop at roc

All of the current displayed Orthofeet shoes are on sale. These shoes are sleek in design, feel as if you are walking on clouds, and has an arch booster system. Ask for size availability on any of the displayed Orthofeet shoe styles.

Never stop moving.

the shop at roc

**Reno
Orthopedic
Center**

The future of orthopedic care is here.

**What's
Different
about ROC**

Specializing in What Moves You.
Ligament, injury, or condition, and a uniquely trained, uniquely ROC specialist standing by to attentive, leading-edge care that moving again.
Over the past 65 years, we've grown to meet the needs of both our community region. We are a team of over 100 highly trained specialists and 1,000s of support staff that are located in Reno, Carson City, & Sparks.
At our Reno campus, we provide every orthopedic service under one roof. From walk-in orthopedic physician visits, imaging, casting, therapy, a five-suite surgery center, a hip program, visionary research, and educational spaces.

Patient Tools

MyChart Features:
Find Care Now: Get the care you need, when you need it. Find a provider, book an appointment, and get the care you need, when you need it.
Self Scheduling: Take control of your care. Book your appointment online, 24/7.
Patient Marketplace: Get the care you need, when you need it. Find a provider, book an appointment, and get the care you need, when you need it.
HURTI App: Get the care you need, when you need it. Find a provider, book an appointment, and get the care you need, when you need it.

ROC Express

Orthopedic Walk-In Clinic for Bones, Joints, & Muscles.
Injuries don't happen by appointment. Fast, affordable treatment by orthopedic specialists with none of the hassle or expense of a trip to the ER. We specialize in treating injuries of the knee, hand, wrist, foot, ankle, hip, shoulder, elbow, and spine. **Please note, we do not treat rib or head injuries.**

ROC Foundation

Classroom to Lab to Patient.
Bridging the gaps between medical education, research, and patient care.
The ROC Foundation was founded by Dr. Timothy J. Bray after he published the book "Techniques in Fracture Fixation". Dr. Bray's vision was to create a 501(c)3 that would fill education need in medicine in our area, and we've been growing ever since.

1. Flat black bronze metal is used as the base of the airport map along with being backing for information on the wood.
2. White powder coating is used on the numbers, words, and pictograms placed on the flat black bronze metal.
3. Various purple (ilac & heather) powder coatings is used on the general map design and the key.
4. Flat black bronze metal is shown through the purple powder coating via a stencil.
5. Western elm wood wooden slats are used to create the overall frame of the airport map.

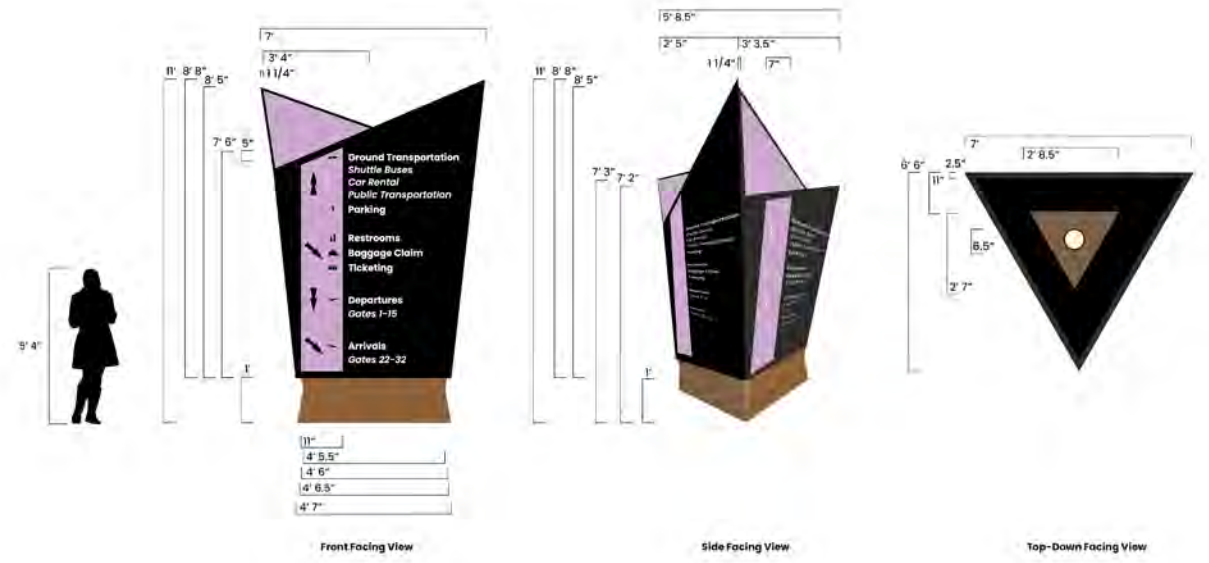

- 1.** Flat carbon steel rods used as supports to connect to the upper roof of the airport
- 2.** This upper piece is encased with lilac clear acrylic with back lighting inside.
- 3.** White powder coating is used on the lettering for both the name of the airport and directions.
- 4.** Flat black bronze metal is used as both the frame and supporting base of the acrylic along with the support for the information.
- 5.** Black powder coating is used only for the pictograms with one directional arrow and one identifier icon.
- 6.** Lilac powder coating is used on the surrounding parts of the icon on top of the directionary sign.
- 7.** Western elm wood is used as the support beam and base of the sign.

- 1.** Clear lilac acrylic encased in the flat black bronze metal with back lighting on the inside.
- 2.** Flat black bronze metal is used as both the frame and supporting base of the acrylic along with the support for the information.
- 3.** White powder coating is used on the lettering, pictograms, and arrows when on the flat black bronze metal.
- 4.** Lilac powder coating is used on the surrounding parts of the icon on top of the directionary sign.
- 5.** Black powder coating is used only for the lettering, pictograms, and arrows when on the lilac powder coating.
